

Nicolás Antonio Andrade Retamal

Full-Stack Developer | C#/.NET | Enterprise Applications

Santiago, Chile · +56 9 2228 5663 · nicolasandraderetamal@hotmail.com · linkedin.com/in/nicolas-antonio-andrade-retamal · nicolasandraderetamal.github.io

PROFESSIONAL PROFILE

Full-stack developer with over 4 years of experience building enterprise applications with C#/.NET and TypeScript. I have worked on projects for the fintech, automotive, education, logistics and industrial sectors, delivering end-to-end solutions, systems integrations and process automation, from analysis and design through to deployment and production support.

PROFESSIONAL EXPERIENCE

Full-Stack Developer · BMSoftware March 2024 – Present
Enterprise applications for a range of industries, taking part from requirements analysis through to deployment and production support.

- Modernised legacy platforms towards .NET and Vue.js, preserving contracts and compatibility with existing systems and integrators.
- Built automotive quoting modules with real-time financial calculations, discount and financing rules, and integration with credit assessment services.
- Implemented integrations through APIs, webhooks and asynchronous processes, adding validation, retries and deduplication to keep data consistent.
- Built B2B and university platforms with enterprise authentication, role-based access control, document management and approval workflows.
- Took part in deployments with Docker, GitHub Actions and IIS, production incident resolution and technical meetings with clients.

Backend Developer · Betterplan · Fintech February 2023 – January 2024
Backend for a financial advisory and planning platform built on microservices.

- Developed and maintained C#/.NET microservices within a contract-first architecture with gRPC/gRPC-Web services and REST APIs.
- Implemented Hangfire jobs to synchronise transactions, process financial information, generate documents and send notifications.
- Contributed to integrations with financial services, identity providers and external tools for communication, customer support and sales.
- Improved performance by migrating communications to gRPC and tuning Entity Framework queries that fetched unnecessary data.

Junior Systems Analyst · DNK Water February 2022 – September 2022
Solutions for remote monitoring and maintenance of water networks through telemetry integration and automation.

- Contributed to an ETL process consolidating telemetry and external data through incremental loads, concurrent processing and bulk inserts on SQL Server.
- Collaborated on backend services for a multi-tenant platform for remote monitoring and leak detection, with access control and processing of field device data.
- Built, together with the team, a Telegram bot that let field workers query information and run frequent operations without depending on technical support.

TECHNICAL SKILLS

Languages	C#, TypeScript, JavaScript, SQL
Backend	ASP.NET Core, Entity Framework Core, NestJS, REST APIs, gRPC, Hangfire, RabbitMQ
Databases	PostgreSQL, SQL Server, Oracle
Frontend	Vue.js, Angular, React, Next.js, Tailwind CSS
Security	OAuth 2.0, OpenID Connect, SAML 2.0, JWT, Azure AD / Entra ID
Cloud & DevOps	Azure, AWS, Docker, GitHub Actions, GitLab CI/CD, IIS, Git

EDUCATION AND LANGUAGES

Programmer Analyst CFT INACAP · 2018–2021	Spanish: native English: B2, upper intermediate
